In *Negras in Brazil*, Kia Lilly Caldwell examines the life experiences of Afro-Brazilian women whose stories have until now been largely untold. This pathbreaking study

analyzes the links between race and gender and broader processes of social, economic, and political exclusion. Drawing on ethnographic research with social movement organizations and thirty-five life history interviews, Caldwell explores the everyday struggles Afro-Brazilian women face in their efforts to achieve equal rights and full citizenship. "M.C. Mirow has set himself a difficult task, to contribute a one-volume introduction to Latin American law in English, and he has succeeded admirably." —Law and History Review "The impressive scope of this book makes it a major contribution to Latin American legal history. . . . This is an excellent starting place for anyone interested in the legal history of the region, and it is essential reading for those seeking to understand the roots of contemporary Latin American politics and society." —Lauren Benton, New York University, author of *Law and Colonial Cultures: Legal Regimes in World History, 1400-1900* Private law touches

every aspect of people's daily lives—landholding, inheritance, private property, marriage and family relations, contracts, employment, and business dealings—and the court records and legal documents produced under private law are a rich source of information for anyone researching social, political, economic, or environmental history. But to utilize these records fully, researchers need a fundamental understanding of how private law and legal institutions functioned in the place and time period under study. This book offers the first comprehensive introduction in either English or Spanish to private law in Spanish Latin America from the colonial period to the present. M. C. Mirow organizes the book into three substantial sections that describe private law and legal institutions in the colonial period, the independence era and nineteenth century, and the twentieth century. Each section begins with an introduction to the nature and function of private law during

the period and discusses such topics as legal education and lawyers, legal sources, courts, land, inheritance, commercial law, family law, and personal status. Each section also presents themes of special interest during its respective time period, including slavery, Indian status, codification, land reform, and development and globalization. In this book Uwe Steinhoff describes and explains the basic tenets of just war theory and gives a precise, succinct and highly critical account of its present status and of the most important and controversial current debates surrounding it. Rejecting certain in effect medieval assumptions of traditional just war theory and advancing a liberal outlook, Steinhoff argues that every single individual is a legitimate authority and has under certain circumstances the right to declare war on others or the state. He also argues that the just cause cannot be established independently of the other criteria of jus ad bellum (the justification of

entering a war), except for right intention, which he interprets more leniently than the tradition does. Turning to jus in bello (which governs the conduct of a war) he criticises the Doctrine of Double Effect and concludes that insofar as wars kill innocents, and be it as "collateral damage", they cannot be just but at best justified as the lesser evil. Steinhoff gives particular attention to the question why soldiers, allegedly, are legitimate targets and civilians not. Discussing four approaches to the explanation of the difference he argues that the four principles underlying them all need to be taken into account and outlines how their weighing can proceed if applied to concrete cases. The resulting approach does not square the distinction between legitimate and illegitimate targets with the distinction between soldiers and civilians, which has extremely important consequences for the conduct of war. Finally, Steinhoff analyses the concept of terrorism and argues that

some forms of "terrorism" are actually no terrorism at all and that even terrorism proper can under certain circumstances be justified. This book is a project of the Oxford Leverhulme Programme on the Changing Character of War. By offering an inside look at what is arguably the most successful newspaper in the country, this book makes an important contribution to the history of journalism. It answers such questions as: How do stories get selected for the front page? How does a newspaper balance the needs of its readers with those of its advertisers? How do the people being written about respond to the coverage? David Gelsanliter chose The Dallas Morning News because it was a family controlled newspaper which was quickly becoming the leading newspaper in the southwest, winning six Pulitzer Prizes along the way, one of them for graphics - the only newspaper ever to do so. The focus is on a week in the life of The Morning News, the death a month later of its rich and powerful rival

the Dallas Times Herald and how The News has challenged some of the industry's conventional wisdoms. Pollution of waterbodies and the environment by petroleum industry is of particular concern in Nigeria. This problem can be addressed by the application of constructed wetlands (CWs) which is a nature-based system that is simple to construct, have low operational and maintenance costs in terms of supply of energy and its periodic maintenance. The application of CWs in Nigeria for polishing of petroleum refinery wastewater is an unprecedented research. This PhD thesis focused on some specific objectives which were characterization of treated secondary refinery wastewater, design, construction, operation and monitoring of planted (T. latifolia, C. alternifolius and C. dactylon) and unplanted vertical subsurface flow, horizontal subsurface flow and hybrid CWs for the removal of suspended solids, nutrients, heavy metals, organic matter

and organic pollutants. The CWs effectively treated the petroleum contaminated wastewater to effluent compliance limits. In this study, *T. latifolia* planted CWs had consistently higher removal efficiencies for all the measured parameters than *C. alternifolius* and *C. dactylon* planted CW systems. Therefore, in order to improve the wastewater quality discharged by Kaduna Refining and Petrochemical Company (KRPC) Nigeria, meet stringent guidelines and protect the recipient streams, installation of CWs at the effluent discharge point of KRPC is strongly recommended. From the acclaimed globalization critic, a far-reaching analysis of America's military, economic, and political vulnerability The empire seems unassailable, but the empire is weak-and precisely because of its imperial ambitions. So argues Walden Bello's provocative new book, which systematically dissects the strategic, economic, and political dilemmas confronting America

as a consequence of its quest for global domination. An award-winning development expert, Bello shows how despite the enormity of the U.S. defense budget, American forces are already overextended, a condition bound to intensify as each local "victory" breeds simmering resistance and new confrontation. He points to the empire's looming economic breakdown, the result of its gargantuan military costs, record-breaking deficits, and exploitative trade and investment relations with developing countries. On the political front, he warns of the bitter disillusionment mounting around the world in response to America's failure to champion liberal democracy. Everywhere America goes, crony capitalism, hostile coercion, and gross inequalities in income eat away at expectations of justice and inclusion. A clear and prophetic examination, *Dilemmas of Domination* reveals a not-too-distant future in which the empire's hidden

weaknesses will yield fatal challenges to American supremacy. This is the first book-length biography of Andrés Bello, the nineteenth-century Latin American intellectual, to appear in English. Bello was also a poet, a literary critic, and an influential statesman whose contributions to nation-building and Spanish American identity are widely recognized across the region. This work provides a comprehensive interpretation of Bello's work, gives an account of Bello's life based on new information from archives in four countries, and sheds new light on this critical period in Latin American history. This book examines the Chinese opium crisis from the perspective of Qing prohibition efforts. The author argues that opium prohibition, and not the opium wars, was genuinely imperial in scale and is hence much more representative of the actual drug problem faced by Qing administrators. In the early morning of March 31, 1970 in Belo Horizonte, Brazil, the annual birthday celebration

of a prominent and wealthy young artist is taking place; and a train docked in Plaza Station filled with starving, drought-stricken migrant workers seeking relief gets turned away by the authorities, sparking a riot. From these seemingly unrelated events, Ivan Angelo's remarkable debut novel connects and implicates the lives of a complex of characters spanning three decades of tumultuous social and political history in twentieth-century Brazil. But with the central event - the celebration - missing, the reader is thrust into the middle of an intricate puzzle, left to construct the story from the evidence that accrues in a range of comic, unnerving, misleading and tragic episodes. In the early 1980s, the author and his associates were evaluating a new cockroach control product in a high-rise housing project. Cockroach populations were high, even though the apartment they were in was squeaky clean. The three small children that shared a twin bed

there looked different, but no one was sure why. Dr. Frishman pointed out that they didn't have any eyebrows or lashes, and then he exposed thousands of roaches hiding behind the headboard. Some things you never forget. Having Paul Bello, an industry expert himself with years of practical experience, team up with Dr. Cockroach makes *The Cockroach Combat Manual II* a must-read because cockroach control is deserving of our best efforts. Presents a collection of papers on aspects of Islam in Africa. This book intends to establish an independent and indigenous school of African history that sees history through African eyes. One of three independent but coordinated studies on Brazilian regionalism, this book examines the complex dynamics of state-level and political structures in the politically important state of Minas Gerais. Examines the transformation of politics through digital media, including digital television, online social networking and

mobile computing. Will the world economy be forever more market-oriented and dominated by transnational corporations? This short and trenchant history of the organizations promoting economic globalization--the World Bank, IMF, WTO, and Group of Seven--points to their manifest failings. Walden Bello reviews these institutions' crisis of legitimacy and examines the major new ideas for reform--the Commission on Global Governance's suggestion of an Economic Security Council; the US Congress's Meltzer Commission proposals; and the ideas of financier, George Soros. "Over 400 practical bed bug tips!"--Cover. *Shifting States in Global Markets* contributes to the debates over the political economy of globalization by focusing attention on the increasingly important role of subnational governments in implementing economic policies. Challenging the view that the effects of decentralization are positive or negative uniformly and can be

explained by reference to the influence of national political institutions, Alfred Montero uses his comparisons of industrial policy in Brazil and Spain, and between different regions in these countries, to argue that we need to pay attention to political conditions at the subnational level to account for the variation in economic success between regions. Two crucial conditions are emphasized in Montero's analysis: how much competition there is among political elites within any region, and how much competition there is between regions for scarce fiscal resources. Lower competition among elites leads to subnational governments delegating more autonomy to public agencies to develop ties with private businesses favoring allocative efficiency and innovation; higher competition between regions provides incentives for political leaders to support involvement in economic development efforts by a greater variety of public agencies, whose

cooperation and mutual trust over time create the conditions for long-term success in these efforts. This analysis gives us a much more nuanced understanding of how countries are experiencing the challenges of globalization today. Details the ongoing research undertaken by the Smithsonian A comprehensive text that presents an economic study of Brazil from a regional, labour and developmental viewpoint. Regional wage differentials are examined. This is an introduction to the mathematical foundations of uncertain reasoning. "This workshop, Complex Battlespaces: The Law of Armed Conflict and the Dynamics of Modern Warfare, was held at West Point on October 24-26, 2016. It marked the official opening of the Lieber Institute." -- ECIP forward. A synthesis of intellectual and social history, *Walking in the Way of Peace* investigates the historical context, meaning, and expression of early Quaker pacifism in England and its

colonies. In a nuanced examination of pacifism, Weddle focuses on King Philip's War, which forced New England Quakers, rulers and ruled alike, to define the parameters of their peace testimony. Publisher Description It has been almost thirty years since the publication of a book that is entirely dedicated to the theory, description, characterization and measurement of the thermal conductivity of solids. The recent discovery of new materials which possess more complex crystal structures and thus more complicated phonon scattering mechanisms have brought innovative challenges to the theory and experimental understanding of these new materials. With the development of new and novel solid materials and new measurement techniques, this book will serve as a current and extensive resource to the next generation researchers in

the field of thermal conductivity. This book is a valuable resource for research groups and special topics courses (8-10 students), for 1st or 2nd year graduate level courses in Thermal Properties of Solids, special topics courses in Thermal Conductivity, Superconductors and Magnetic Materials, and to researchers in Thermoelectrics, Thermal Barrier Materials and Solid State Physics. Tropical Capitalism traces the rise of Brazil's second largest industrial center, a planned city created in the 1890s as the capital of Minas Gerais, the nation's second most populous state. Marshall Eakin offers the industrialization of Belo Horizonte as an example of an extreme form of the pattern of Brazilian industrialization - a variation of capitalism characterized by state intervention, clientelism, family networks, and the lack of technological innovation. At the core of the analysis are the webs of power formed by politicians, technocrats, and entrepreneurs who drove

forward the process of industrialization. The first comprehensive analysis of Belo Horizonte, this book explores industrialization in Latin America, and looks beneath the larger, national economy to dissect a city and region. Includes entries for maps and atlases. Eugenia Roldan Vera's study explores the popularisation and spreading of knowledge and science in South American countries which received books from the British publisher Rudolph Ackermann from 1823 to 1830. Study of selected pirate novels of the 19th century which illustrates the relationship between varied images of pirates and the different political projects of the authors, and the use of pirates as emblems of the struggle of Spanish America to transform "Contains translations of a broad selection of poetry, essays, and speeches illustrating richness and complexity of Bello's thought as a key intellectual figure in the construction of a new political order in

postindependence Latin America. Extracted from Explores the moral dimensions of the current global role of the U.S. military. "Brian Orend explores the ethics of war and peace from a Kantian perspective, emphasizing human rights protection, the rule of international law and a fully global concept of justice. Contending that Kant's just war doctrine has not been given its due, Orend displays Kant's theory to its fullest, impressive effect. He then completely and clearly updates Kant's perspective for application to our time."--Jacket. This book provides an annotated English translation of Gerard of Cremona's Latin version of Book I of al-Nayrizi's Commentary on Euclid's Elements. Lo Bello concludes with a critical analysis of the idiosyncrasies of Gerard's method of translation. Compiled by Robert Lawless, this web site contains an A-Z bibliography of literature
