Raise the Room May 30 2020 Have you ever found yourself at the front of a room, calling on the same two hand-raisers, zipping through text-heavy slides, burdened with all of the information you are trying to cover -- and wondered frantically why your audience seems so disengaged (and maybe even resentful)? This approach to running meetings, workshops, and classes is extremely common, yet it's largely ineffective because this one-way flow of information doesn't inspire innovation, inclusivity, or buy-in. Raise the Room reminds us: there's a better way! Author Eva Jo Meyers proposes that we shift from a talking-head model to a more inclusive model when we lead engagements, ensuring that everyone in the room has a voice and an opportunity to share their wisdom. Drawing on her career as a leader and professional facilitator, she describes the principles of Transformational Facilitation and how to apply them in real life. The goal: to help you create spaces in which every person feels motivated and can thrive as a fully included and indispensable member of the group. The book is organized into five sections, each one providing actionable tips and tricks you can harness to breathe new life into your events: Be Prepared: How to generate clear goals and objectives, schedule breaks, and create useful handouts Create a Safer Environment: Ideas for setting a welcoming ambiance, creating a braver space for introductions, and building stronger teams Transfer Power to the Participants: Strategies to help enforce equal airtime, access prior knowledge, and minimize lectures Use Active Learning and Engagement Strategies: How to integrate art projects, videos, pair-shares, quotes, and research to stimulate deep thinking Motivate Action: Ideas that enable participants to follow through on their plans through continued support, networking, and exit tickets Whether you're leading meetings, classes, workshops, or simply running the occasional small-group brainstorming session, you can immediately apply the practical tools in this book to create a more memorable and meaningful experience for everyone. Your participants will thank you -- because rather than trying to lead the room, you'll be empowering the room to lead. Join the movement to Raise the Room and change the world -- one engagement at a time.

In today's world of overabundant consumer choices and superfluous apps, upgrades, add-ons, and features, brands have become nearly identical, as their efforts to outdo one another have pushed them into a dizzying herd of indistinct options. Youngme Moon identifies the outliers, the mavericks, the iconoclasts—the players who have thoughtfully rejected orthodoxy in favor of an approach that is more adventurous. Some are even “hostile,” almost daring you to buy what they are selling. Using her original research on companies such as IKEA and Google, Moon will inspire you to be counterintuitive and meaningfully different—to rethink your business strategy, to stop conforming and start deviating, to stop emulating and start innovating. Because to stand out you must become the exception, not the rule.

Enterprise Modeling Jan 26 2020 This book offers practical advice on managing enterprise modeling (EM) projects and facilitating participatory EM sessions. Modeling activities often involve groups of people, and models are created in a participatory way. Ensuring that this is done efficiently requires dedicated individuals who know how to organize modeling projects and sessions, how to manage discussions during these sessions, and what aspects influence the success and efficiency of modeling in practice. The book also includes a summary of the theoretical background to EM, although participatory modeling can also be used in conjunction with other methods that are not made for EM, such as those made for goal-oriented requirements engineering and information systems analysis. The first four chapters present an overview of enterprise modeling from various viewpoints (including methods, processes and organizational challenges), providing a background for those that need to refresh their basic knowledge. The next six chapters form the core of the book and detail the roles and competences needed in an EM project, typical stakeholder behaviors and how to handle them, tools and methods for managing participatory modeling and facilitation, and how to train modeling experts for these social aspects of modeling. Lastly, a concluding chapter presents a summary and an outlook on current research in participatory EM. This book is intended for anybody who wants to learn more about how to facilitate participatory modeling in practice and how to set up and carry out EM projects. It does not require any in-depth knowledge about specific EM methods and tools, and can be used by students and lecturers for courses on participatory modeling, and by practitioners wanting to extend their knowledge of social and organizational topics to become an experienced facilitator and EM project manager.
