Technological change is a central feature of modern societies and a powerful source for social change. There is an urgent task to direct these new technologies towards sustainability, but society lacks perspectives, instruments and policies to accomplish this. There is no blueprint for a sustainable future, and it is necessary to experiment with alternative paths that seem promising. Various new transport technologies promise to bring sustainability benefits. But as this book shows, important lessons are often overlooked because the experiments are not designed to challenge the basic assumptions about established patterns of transport choices. Learning how to organise the process of innovation implementation is essential if the maximum impact is to be achieved - it is here that strategic niche management offers new perspectives. The book uses a series of eight recent experiments with electric vehicles, carsharing schemes, bicycle pools and fleet management to illustrate the means by which technological change must be closely linked to social change if successful implementation is to take place. The basic divide between proponents of technological fixes and those in favour of behavioural change needs to be bridged, perhaps indicating a third way.

Jones Diaries, retired civil servant Bernard Jones is
approaching his 64th birthday. Making money through
investing remains as elusive as ever, though his overbearing
and over-sexed wife Eunice finds no trouble spending it. Hell's
Bells, the share club started at the Ring o'Bells pub by a
coterie of dubious acquaintances, seems to be a better forum
for gawping at barmaids and consuming pork scratchings than

it is for an elevated debate over price earnings ratios and dividend yields. As ever, Bernard's family, Guardian-reading schoolteacher son Brian, dopey daughter Jemima and malevolent grandchild Digby (a.k.a. The Antichrist) all seem to stand in the way of his reaching financial nirvana. Worst of all is Bernard's dotty mother Dot, who holds in her palsied hands an inheritance that can make or break the family. Bernard is an emblem for the thousands of small investors whose stories of struggle and persistence are never told, an operating prophet for those weighed down by a demanding spouse-to-earnings ratio.

Alan Lomax is a legendary figure in American folk music circles. Although he published many books, hundreds of recordings and dozens of films, his contributions to popular and academic journals have never been collected. This collection of writings, introduced by Lomax's daughter Anna, reintroduces these essential writings. Drawing on the Lomax Archives in New York, this book brings together articles from the 30s onwards. It is divided into four sections, each capturing a distinct period in the development of Lomax's life and career: the original years as a collector and promoter; the period from 1950-58 when Lomax was recording throughout Europe; the folk music revival years; and finally his work in academia.
