Racisms Jan 27 2020 A groundbreaking history of racism Racisms is the first comprehensive history of racism, from the Crusades to the twentieth century. Demonstrating that there is not one continuous tradition of racism, Francisco Bethencourt shows that racism preceded any theories of race and must be viewed within the prism and context of social hierarchies and local conditions. In this richly illustrated book, Bethencourt argues that in its various aspects, all racism has been triggered by political projects monopolizing specific economic and social resources. Racisms focuses on the Western world, but opens comparative views on ethnic discrimination and segregation in Asia and Africa. Bethencourt looks at different forms of racism, and explores instances of enslavement, forced migration, and ethnic cleansing, while analyzing how practices of discrimination and segregation were defended. This is a major interdisciplinary work that moves away from ideas of linear or innate racism and recasts our understanding of interethnic relations.

Animals into Art Nov 18 2021 This book is one of a series of volumes resulting from the World Archaeological Congress, September 1986 which addressed world archaeology in its widest sense, investigating how people lived in the past and how and why changes took place

to result in the forms of society and culture which exist now. The series brought together archaeologists and anthropologists from many parts of the world, academics from contingent disciplines, and also non-academics from a wide range of cultural backgrounds who could lend their own expertise to the discussions. This book is an exploration of the way in which the animal world features in the works of art of a variety of cultures of different times and places. Contributors have adopted a variety of perspectives for looking at the complex ways in which past and present humans have interrelated with beings they classify as animals. Some of the approaches are predominantly economic and ecological, some are symbolic and others philosophical or theological. All these different views are included in the interpretation of the artworks of the past, revealing some of the foci and inspirations of cultural attitudes to animals. Originally published 1989.

What Is Paleolithic Art? May 13 2021 The noted archaeologist explores the varieties of prehistoric cave art across the world and offers surprising insights into its purpose and meaning. What drew our Stone Age ancestors into caves to paint in charcoal and red hematite, to watch the likenesses of lions, bison, horses, and aurochs as they flickered by firelight? Was it a creative impulse, a spiritual dawn, a shamanistic conception of the world? In this book, Jean Clottes, one of the most renowned figures in the study of cave paintings, pursues an answer to the "why" of Paleolithic art. Discussing sites and surveys across the world, Clottes offers personal reflections on how we have viewed these paintings in the past, what we learn from looking at them across geographies, and what these paintings may have meant—and what function they may have served—for their artists. Steeped in Clottes's shamanistic theories of cave painting, *What Is Paleolithic Art?* travels from well-known Ice Age sites like Chauvet, Altamira, and Lascaux to visits with contemporary aboriginal artists, evoking a continuum between the cave paintings of our prehistoric past and the living rock art of today. Clottes's work lifts us from the darkness of our Paleolithic origins to reveal surprising insights into how we think, why we create, why we believe, and who we are

Economy and Society in Central and Eastern Europe Jan 09 2021 The analysis of societies' transformations and the influence on the modernization of Central and Eastern Europe economies -- between the pre-modern period and the 20th century -- is a useful tool for understanding contemporary trends in the region, particularly since the debates on economic and social reconstruction find their counterpart in modern state construction projects. The history of this region of Europe -- described as a space of ethnic, religious, and cultural diversity -- is illustrated in this book through the dimension of territory, population, and consumption. The book's contributions were presented at an international conference in Alba Iulia, Romania, in April 2013. (Series: Eastern Europe / Osteuropa - Vol. 8)

Handbook of Art and Global Migration Jan 21 2022 How can we think of art history as a discipline that moves process-based, performative, and cultural migratory movement to the center of its theoretical and methodical analyses? With contributions from internationally renowned experts, this manual, for the first time, provides answers as to what consequences the interaction of migration and globalization has on research in the field of the science of art, on curatory practice, and on artistic production and theory. The objective of this multi-vocal anthology is to open up an interdisciplinary discourse surrounding the increased focus on the phenomenon of migration in art history.

Pure and Programme Music in the Romanticism Mar 11 2021 One of the most difficult challenges a music theoretician faces, be it historically, philosophically or in other aspects, is that of correctly and precisely framing the meaning that music has in a specific moment: deducing the "why" and revealing the secret hidden within. The book *Pure and Programme Music in the Romanticism*, a rigorous and indispensable study to understand music in the period in which music as an expression of feelings, begins to reach the threshold of the sublime —primarily focusing attention on what pure and programme music represent. Both types of music are instrumental, but the difference between them is that the first one, pure music, exists on its own, and for its own sake, establishing an iron-clad alliance with the form. Programme music is inspired by other forms of artistic expression, especially literature, and is indelibly linked with the content. However, halfway between these two types of music, a new one is born: absolute music. This music is the result from the dialectic established between the pure and programme, exactly in the middle of two opposing philosophies, that of Idealism and that of Materialism. All of this context described in this book is what defines the essence of Romantic music but also what allows us to understand the music of the twentieth century and that of today, because the controversy between pure music and programme music has represented, in the history of western musical thought, the turning point that led to the creation of the Gesamtkunstwerk (Total Work of Art) and the relationship between music and film, for example, as well as other artistic expressions. *Housing the New Romans* Aug 23 2019 In the last twenty years, reception studies have significantly enhanced our understanding of the ways in which Classics has shaped modern Western culture, but very little attention has been directed toward the reception of classical architecture. *Housing the New Romans: Architectural Reception and Classical Style in the Modern World* addresses this gap by investigating ways in which appropriation and allusion facilitated the reception of Classical Greece and Rome through the requisition and redeployment of classicizing tropes to create neo-Antique sites of "dwelling" in the 19th and early 20th centuries. The volume, across nine

essays, will cover both European and American iterations of place making, including Sir John Soanes' house in London, the Hôtel de Beauharnais in Paris, and the Getty Villa in California. By focusing on structures and places that are oriented towards private life-houses, hotels, clubs, tombs, and gardens—the volume directs the critical gaze towards diverse and complex sites of curatorial self-fashioning. The goal of the volume is to provide a multiplicity of interpretative frameworks (e.g. object-agency enchantment, hyperreality, memory-infrastructure) that may be applied to the study of architectural reception. This critical approach makes *Housing the New Romans* the first work of its kind in the emerging field of architectural and landscape reception studies and in the hitherto textually dominated field of classical reception.

The Soul of Art Jun 25 2022 The beginnings of art are lost in the dim reaches of prehistory, eons before humans began recording and codifying their experiences in writing. And yet philosophers, artists, and historians have for centuries noted the intimate and perhaps inseparable relationship between human consciousness and the artistic impulse. As analyst and professor Christian Gaillard notes, we can see some of the earliest expressions of this intimacy in the cave paintings at Lascaux, and the relationship continues to the present day in the works of modern creators such as Jackson Pollock and Anselm Kiefer. What fascinates Gaillard—and, indeed, what fascinated Carl Jung—is, among other things, the notion that art enables us to explore our inner landscapes in ways that are impossible by any other means. In *The Soul of Art: Analysis and Creation*, Gaillard takes readers on a tour of his own “gallery of the mind,” examining works of art from throughout history—and prehistory—that have moved, challenged, and changed him. He also explores instances where particular works of art have proven deeply significant in his or his colleagues’ understanding of their analyses and their ability to serve as capable guides on the journey toward self-awareness.

Le féminin dans l'art occidental Jan 01 2023 Dans la pensée occidentale, le féminin a été associé à l'idée de nature et de mort. Nul commandement divin, nulle parole civilisatrice n'est venue combattre cette notion, bien au contraire. A l'union du masculin et du féminin, voie d'accès à l'éternité, succède aujourd'hui une autre orientation : gommer la différence des sexes, métamorphoser le corps mortel en un outil performant. L'amour tentait d'unir ce qui était séparé, la technique doit permettre d'inventer un être autonome, libéré des contraintes que fait peser sur lui la nature, un être capable d'accéder seul à l'immortalité. L'art est, depuis plus d'un siècle, le témoin et l'acteur de ce changement. Les performances auxquelles se réduisent le plus souvent les "œuvres" de certains artistes, mais aussi le cinéma et la littérature, s'emploient à briser les tabous sur lesquels est bâtie notre culture. Et les élites, à nouveau fascinées par la violence, qu'elle ait un alibi artistique, religieux ou politique, regardent sans horreur, parfois même avec complaisance, l'homme primitif émerger dans notre monde quotidien et sur la scène artistique. Cette avancée de la barbarie annonce la fin de la civilisation et prépare

l'avènement de l'homme futur. Celui-ci sera libéré de l'éthique mais il dépendra de la technique. Il n'aura ni nos valeurs ni notre mode de perception. L'image à travers laquelle nos contemporains cherchent désespérément à approcher le réel, est la porte qui lui ouvrira un monde nouveau, le monde virtuel.

Indigenous Heritage and Rock Art Sep 04 2020 Prof. Daniel Arsenaault, a leading exponent of Canadian Shield rock art, sadly passed away in 2016. This book contains 14 thought-provoking chapters dealing with Daniel's first love—the archaeology of artistic endeavour. It provides the reader with new ideas about the interpretation and dating of rock art, ethnography, heritage and material culture.

Bouchardon Nov 26 2019 One of the most imaginative and fascinating artists of eighteenth-century France, Edme Bouchardon (1698-1762) was instrumental in the transition from Rococo to Neoclassicism and in the artistic rediscovery of classical antiquity. Much celebrated in his time, Bouchardon created some of the most iconic images of the age of Louis XV. His oeuvre demonstrates a remarkable variety of themes (from copies after the antique to subjects of history and mythology, portraiture, anatomical studies, ornament, fountains and tombs), media (drawings, sculptures, medals, prints), and techniques (chalk, plaster, wax, terracotta, marble, bronze). With five essays by experts on Bouchardon's sculpture and graphic arts, more than 140 catalogue entries, and a detailed chronology, this book aims to demonstrate the originality of Bouchardon's art within the cultural and social context of the period, while suggesting the subtle relationship between, as well as the relative autonomy of, the artist's two careers as a sculptor and a draftsman. This lavishly illustrated publication represents an unprecedented and thorough survey on this major and unique artist from the Age of Enlightenment, offering in-depth scholarship based on unpublished material.

Image and Incarnation Jun 01 2020 These essays explore various inflections of the relation between image-making and incarnation doctrine. They illumine ways this fundamental mystery was construed as representable, and how it was seen to license the representation of other mysteries of faith.

Anthropological and historical sciences.

Aesthetics and the sciences of art Sep 16 2021

Volume 9: Aesthetics and Philosophy of Art Mar 23 2022 This book continues the series *Contemporary Philosophy* (International Institute of Philosophy), which surveys significant trends in contemporary philosophy. The new volume on *Aesthetics*, comprising nineteen surveys, shows the variety of approaches to *Aesthetics* in various cultures. The close connection between *aesthetics* and religion and between *aesthetics* and ethics is emphasized in several contributions.

Nile Into Tiber Oct 25 2019 "Egypt in the Roman world" --- Studies on the meaning of *Aegyptiaca Romana* and the understanding of the cults of Isis in their local context.

Palaeolithic Cave Art at Creswell Crags in European Context Nov 06 2020 Cave art is a subject of perennial interest among archaeologists. Until recently it was assumed that it was largely restricted to southern France and northern Iberia, although in recent years

new discoveries have demonstrated that it originally had a much wider distribution. The discovery in 2003 of the UK's first examples of cave art, in two caves at Creswell Crags on the Derbyshire/Nottinghamshire border, was the most surprising illustration of this. The discoverers (the editors of the book) brought together in 2004 a number of Palaeolithic archaeologists and rock art specialists from across the world to study the Creswell art and debate its significance, and its similarities and contrasts with contemporary Late Pleistocene ('Ice Age') art on the Continent. This comprehensively illustrated book presents the Creswell art itself, the archaeology of the caves and the region, and the wider context of the Upper Palaeolithic era in Britain, as well as a number of up-to-date studies of Palaeolithic cave art in Spain, Portugal, France, and Italy which serve to contextualize the British examples.

Scripture Re-envisioned: Christophanic Exegesis and the Making of a Christian Bible Mar 30 2020 In *Scripture Re-envisioned* Bogdan B. Bucur discusses the exegesis of biblical theophanies as an essential “ingredient” for the gradual crystallization of a distinct Christian exegesis, doctrine, liturgy, and spirituality during the first millennium CE.

The Turn of the Century/Le tournant du siècle Apr 11 2021

Handbook of Rock Art Research Aug 04 2020 While there has always been a large public interest in ancient pictures painted or carved on stone, the archaeological study of rock art is in its infancy. But intensive amounts of research has revolutionized this field in the past decade. New methods of dating and analysis help to pinpoint the makers of these beautiful images, new interpretive models help us understand this art in relation to culture. Identification, conservation and management of rock art sites have become major issues in historical preservation worldwide. And the number of archaeologically attested sites has mushroomed. In this handbook, the leading researchers in the rock art area provide cogent, state-of-the-art summaries of the technical, interpretive, and regional advances in rock art research. The book offers a comprehensive, basic reference of current information on key topics over six continents for archaeologists, anthropologists, art historians, and rock art enthusiasts.

"L"image du noir dans l'art occidental May 25 2022

The Oxford Handbook of the Archaeology and Anthropology of Rock Art Jun 13 2021 Rock art is one of the most visible and geographically widespread of cultural expressions, and it spans much of the period of our species' existence. Rock art also provides rare and often unique insights into the minds and visually creative capacities of our ancestors and how selected rock outcrops with distinctive images were used to construct symbolic landscapes and shape worldviews. Equally important, rock art is often central to the expression of and engagement with spiritual entities and forces, and in all these dimensions it signals the diversity of cultural practices, across place and through time. Over the past 150 years, archaeologists have studied ancient arts on rock surfaces, both out in the open and within caves and rock shelters, and social

anthropologists have revealed how people today use art in their daily lives. The Oxford Handbook of the Archaeology and Anthropology of Rock Art showcases examples of such research from around the world and across a broad range of cultural contexts, giving a sense of the art's regional variability, its antiquity, and how it is meaningful to people in the recent past and today - including how we have ourselves tended to make sense of the art of others, replete with our own preconceptions. It reviews past, present, and emerging theoretical approaches to rock art investigation and presents new, cutting-edge methods of rock art analysis for the student and professional researcher alike.

Rock Art Studies - News of the World

Volume 3 Jul 03 2020 This is the third in the five-yearly series of surveys of what is happening in rock art studies around the world. As always, the texts reflect something of the great differences in approach and emphasis that exist in different regions. The volume presents examples from Europe, Asia, Africa, and the New World. During the period in question, 1999 to 2004, there have been few major events, although in the field of Pleistocene art many new discoveries have been made, and a new country added to the select list of those with Ice Age cave art. Some regions such as North Africa and the former USSR have seen a tremendous amount of activity, focusing not only on recording but also on chronology, and the conservation of sites. With the global increase of tourism, the management of rock art sites that are accessible to the public is a theme of ever-growing importance.

L'art Ancien a L'exposition de 1878 Aug 28 2022

Prehistoric Art as Prehistoric Culture Oct 18 2021 The diverse papers in this volume, published in honour of Professor de Balbin, cover a wide variety of the decorated caves which traditionally defined Palaeolithic art, as well as the open-air art of the period, a subject in which he has done pioneering work at Siega Verde and elsewhere.

The Egyptian Revival Apr 23 2022 In this beautifully illustrated and closely argued book, a completely updated and much expanded third edition of his magisterial survey, Curl describes in lively and stimulating prose the numerous revivals of the Egyptian style from Antiquity to the present day. Drawing on a wealth of sources, his pioneering and definitive work analyzes the remarkable and persistent influence of Ancient Egyptian culture on the West. The author deftly develops his argument that the civilization of Ancient Egypt is central, rather than peripheral, to the development of much of Western architecture, art, design, and religion. Curl examines: the persistence of Egyptian motifs in design from Graeco-Roman Antiquity, through the Medieval, Baroque, and Neo-Classical periods rise of Egyptology in the nineteenth and twentieth-century manifestations of Egyptianisms prompted by

the discovery of Tutankhamun's tomb various aspects of Egyptianizing tendencies in the Art Deco style and afterwards. For students of art, architectural and ancient history, and those interested in western European culture generally, this book will be an inspiring and invaluable addition to the available literature. *Le monstre dans l'art occidental* Sep 28 2022 *Michel Henry et l'affect de l'art* Nov 30 2022 The studies in this book set out to examine the labile resonances of phenomenology and art in Michel Henry, by examining the different figures of movement given to the concept of the aesthetic by the philosopher. They are preceded by one of Michel Henry's own texts. Les études qui composent ce livre proposent d'interroger les résonances labiles de la phénoménologie et de l'art chez Michel Henry, en examinant les différentes figures du déplacement imprimé par le philosophe au concept d'esthétique. Le tout est précédé d'un texte de Michel Henry.

Canons du corps humain dans l'art français du XIXe siècle Oct 30 2022 Que signifie, dans les discours sur l'art qui traversent le XIXe siècle jusqu'à la mise en cause de la figuration au XXe siècle, la constante référence au canon de proportions ? Pourquoi cette ambition normative revient-elle avec force du néoclassicisme à Le Corbusier ? Art, proportions, science et métaphysique semblaient pourtant avoir été fixés depuis la Renaissance dans un équilibre stable. Mais, au XXe siècle, les termes de cet édifice changent. L'idée de canon resurgit avec une particulière acuité au moment où le système de représentation connaît dans l'art occidental des remises en cause profondes. Voyageant à travers l'extraordinaire floraison de théories de proportions et les surprenantes rêveries auxquelles elles donnent lieu, Claire Barbillon montre comment la question du canon participe directement d'une réflexion sur la création artistique et annonce le passage à l'abstraction. Avant-propos Remerciements Prologue. La théorie des proportions dans l'art occidental, de Diodore de Sicile à Winckelmann I. Savoirs du corps, visions de l'homme ; mutations au XIXe siècle II. L'anthropométrie, science du XIXe siècle III. Chercher dans l'antique les mesures et les lois IV. L'érudition historique du XIXe siècle, menace pour la production de son propre canon ? V. Le canon de Polyclète, rempart idéaliste contre le scientisme darwinien ? VI. Un canon d'art sacré : l'école de Beuron, entre la géométrie et le nombre Épilogue. Architecture and the Historical Imagination Dec 08 2020 Hailed as one of the key theoreticians of modernism, Eugène-Emmanuel Viollet-le-Duc was also the most renowned restoration architect of his age, a celebrated medieval archaeologist and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture such as the *Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle* and *Entretiens sur l'architecture*, but also studies on warfare, geology and racial history. Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration, in all its layered

meaning, shaped his outlook. Through his life journey, we follow the route by which the technological subject was born out of nineteenth-century historicism.

Vignaud Pamphlets Feb 07 2021

The Archaeology of Rock-Art Dec 28 2019 Pictures, painted and carved in caves and on open rock surfaces, are amongst our loveliest relics from prehistory. This pioneering set of sparkling essays goes beyond guesses as to what the pictures mean, instead exploring how we can reliably learn from rock-art as a material record of distant times: in short, rock-art as archaeology. Sometimes contact-period records offer some direct insight about indigenous meaning, so we can learn in that informed way. More often, we have no direct record, and instead have to use formal methods to learn from the evidence of the pictures themselves. The book's eighteen papers range wide in space and time, from the Palaeolithic of Europe to nineteenth-century Australia. Using varied approaches within the consistent framework of informed and proven methods, they make key advances in using the striking and reticent evidence of rock-art to archaeological benefit.

A Companion to Ancient Egyptian Art Feb 19 2022 A Companion to Ancient Egyptian Art presents a comprehensive collection of original essays exploring key concepts, critical discourses, and theories that shape the discipline of ancient Egyptian art. • Winner of the 2016 PROSE Award for Single Volume Reference in the Humanities & Social Sciences • Features contributions from top scholars in their respective fields of expertise relating to ancient Egyptian art • Provides overviews of past and present scholarship and suggests new avenues to stimulate debate and allow for critical readings of individual art works • Explores themes and topics such as methodological approaches, transmission of Egyptian art and its connections with other cultures, ancient reception, technology and interpretation, • Provides a comprehensive synthesis on a discipline that has diversified to the extent that it now incorporates subjects ranging from gender theory to 'X-ray fluorescence' and 'image-based interpretations systems'

History of Archaeology: International Perspectives Feb 28 2020 The present volume gathers the communications of the three sessions organized under the auspices of the Commission 'History of Archaeology' at the XVII UISPP World Congress Burgos 2014.

Celtic Art in Europe Aug 16 2021 The ancient Celtic world evokes debate, discussion, romanticism and mythicism. On the one hand it represents a specialist area of archaeological interest, on the other, it has a wide general appeal. The Celtic world is accessible through archaeology, history, linguistics and art history. Of these disciplines, art history offers the most direct message to a wider audience. This volume of 37 papers brings together a truly international group of pre-eminent specialists in the field of Celtic art and Celtic studies. It is a benchmark volume the like of which has not been seen since the publication of Paul Jacobsthal's *Early Celtic Art* in 1944. The papers chart the history of attempts to understand Celtic art and argue for novel approaches in discussions spanning the whole

of Continental Europe and the British Isles. This new body of international scholarship will give the reader a sense of the richness of the material and current debates. Artefacts of rich form and decoration, which we might call art, provide a most sensitive set of indicators of key areas of past societies, their power, politics and transformations. With its broad geographical scope, this volume offers a timely opportunity to re-assess contacts, context, transmission and meaning in Celtic art for understanding the

development of European cultures, identities and economies in pre- and proto-history.
