The United States and China are arguably the most globally consequential actors of the early twenty first century, and look set to remain so into the foreseeable future. This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people. It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington, and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China. Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today, Turner addresses three key questions: What have been the dominant American images of China and the Chinese across the full lifespan of Sino-US relations? How have historical and

contemporary American images of China and the Chinese enabled and justified US China policy? What role does US China policy play in the production and reproduction of American images of China? Exploring and evaluating a wide-ranging variety of sources including films and television programmes, newspaper and magazine articles, the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy, American politics, China studies and international relations. This text makes a primary and informed contribution to a subject that is under-researched in the UK — the suicide of those who work in the UK police service — by offering an analysis of UK case studies of officers and staff who have either completed suicide or experienced suicide ideation, and referring to the likely prime suicide precipitators in these situations. This analysis is followed by an examination of literature that discusses general and police-specific suicide. The text then examines intervention measures and support mechanisms that are currently offered to those working in the police service, as well as other measures that might be introduced in the future. Designed for criminal justice professionals and affected laypeople, including the families of those in the police service, *Police Suicide* is a crucial text for any who have an interest in the holistic and psychological welfare of police officers and staff. *Tulsian's Quick Revision for Financial Accounting* is a self-study handbook. Loaded with practical questions, this book is a perfect revision text - comprises structured questions based on pattern and scheme adopted in examinations. This book showcases recent academic work on contemporary issues in financial institutions and markets. It covers a broad range of topics, highlighting the diverse nature of academic research in banking and finance. As a consequence the contributions cover a wide range of issues across a broad spectrum, including: capital structure arbitrage, credit rating agencies, credit default swap spreads, market power in the banking industry and stock returns. This timely collection offers fresh insights and understandings into the ongoing debates within and between the academic and professional finance communities. This book was originally published as a special issue of the *European Journal of Finance*. The job interview is probably the most important step you will take in your job search journey. This gripping story of the doctors at the forefront of Alzheimer's research and the courageous North Dakota family whose rare genetic code is helping to understand our most feared diseases is "excellent, accessible...A science text that reads like a mystery and treats its subjects with humanity and sympathy" (Library Journal, starred review). Every sixty-nine seconds, someone is diagnosed with Alzheimer's disease. Of the top ten killers, it is the only disease for which there is no cure or treatment. For most people, there is nothing that they can do to fight back. But one family is doing all they can. The DeMoe family has the most devastating form of the disease that there is: early onset Alzheimer's, an inherited genetic mutation that causes the disease in one hundred percent of cases, and has a fifty percent chance of being passed onto the next generation. Of the six DeMoe children whose father had it, five have inherited the gene; the sixth, daughter Karla, has inherited responsibility for all of them. But rather than give up in the face of such news, the DeMoes have agreed to spend their precious, abbreviated years as part of a worldwide study that could utterly change the landscape of Alzheimer's research and offers the brightest hope for future treatments—and possibly a cure. Drawing from several years of in-depth research with this charming and upbeat family, journalist Niki Kapsambelis tells the story of Alzheimer's through the humanizing lens of these ordinary people made extraordinary by both their terrible circumstances and their bravery. "A compelling narrative...and an educational and emotional chronicle" (Kirkus Reviews, starred review), their tale is intertwined with the dramatic narrative history of the disease, the cutting-edge research that brings us ever closer to a possible cure, and the accounts of the extraordinary doctors spearheading these groundbreaking studies. From the oil fields of North Dakota to the jungles of Colombia, this inspiring race against time redefines courage in the face of this most pervasive and mysterious disease. The November issue is the special annual review of the U.S. Supreme Court's previous Term. Each year, the Supreme Court issue is introduced by noteworthy and extensive contributions from recognized scholars. In this issue, for the 2016 Term, articles include: • Foreword: "1930s Redux: The Administrative State Under Siege," by Gillian E. Metzger • Essay: "Unprecedented? Judicial Confirmation Battles and the Search for a Usable Past," by Josh Chafetz • Comment: "Churches, Playgrounds, Government Dollars — and Schools?," by Douglas Laycock • Comment: "Equality, Sovereignty, and the Family in Morales-Santana," by Kristin A. Collins In addition, the first issue of each new volume provides an extensive summary of the

important cases of the previous Supreme Court docket, covering a wide range of legal, political, and constitutional subjects. Student commentary is thus provided on eighteen of the Leading Cases of the 2016 Term, including such subjects as racial gerrymandering, freedom of speech, regulatory takings, right to effective counsel, equal protection, appellate jurisdiction, fair housing, immigration law, insider trading, venue in patent cases, and remedies for constitutional violations. Complete statistical graphs and tables of the Court's actions and results during the Term are included; these summaries and statistics, including voting patterns of individual Justices, have long been considered very useful to scholars of the Court in law and political science. Finally, the issue includes a linked Index of Cases and citations for the discussed opinions. The Harvard Law Review is offered in a quality digital edition, featuring active Contents, linked footnotes, active URLs, legible tables, and proper ebook and Bluebook formatting. This current issue of the Review is November 2017, the first issue of academic year 2017-2018 (Volume 131). The Review is a student-run organization whose primary purpose is to publish a journal of legal scholarship. It comes out monthly from November through June and has roughly 2500 pages per volume. Student editors make all editorial and organizational decisions. This comprehensive question-and-answer resource covers all aspects of the curriculum for the Part 2 MRCOG examination. Candidates are given the opportunity to practise the Single Best Answer question style, to cover the content they will encounter in the examination and to assess their knowledge. As consultants actively engaged in the writing of the Part 2 Single Best Answers, the authors and editor have provided directly applicable questions. Candidates to review the syllabus in an organised, systematic manner, with comprehensive explanations for each answer. This title also includes new sections on ethics, training, audit and clinical governance. Mock exams are also available online to familiarise candidates with the real-life examination. The detailed answers, evidence and comprehensive list of references offer an excellent training and reading source for all candidates preparing for the Part 2 MRCOG examination. Over the past fifty years we have seen an enormous demographic shift in the number of people migrating to urban areas, proliferated by factors such as industrialisation and globalisation. Urban migration has led to numerous societal stressors such as pollution, overcrowding, unemployment, and resource, which in turn has contributed to psychiatric disorders within urban spaces. Rates of mental illness, addictions, and violence are higher in urban areas and changes in social network systems and support have increased levels of social isolation and lack of social support. Part of the Oxford Cultural Psychiatry series, *Urban Mental Health* brings together international perspectives on urbanisation, its impacts on mental health, the nature of the built environment, and the dynamic nature of social engagement. Containing 24 chapters on key topics such as research challenges, adolescent mental health, and suicides in cities, this resource provides a refreshing look at the

challenges faced by clinicians and mental health care professionals today. Emphasis is placed on findings from low- and middle-income countries where expansion is rapid and resources limited bridging the gap in research findings. We recognise that the journey for you as an overseas medical graduate (OMG) through GP training is likely to be more difficult than for a UK graduate, and so the primary aim of this book is to help you navigate that journey. We hope that through this book we will equip you to be a better UK general practitioner than you might otherwise be. Aninevi Dr Lucy Bailey presents a concise and coherent guide for those who are interested in pursuing a teaching career internationally. This book covers all the things you should consider as well as the advantages and disadvantages of living and working in an entirely new culture and country that you might face. If you've ever considered taking the big leap, looking for a new adventure, and relocating to a completely different country, continent or time zone, then this book will guide you through the steps and help you answer all the big questions to figure out if it's really for you. This is a book that is applicable both for those who are looking to take the journey on their own or with their immediate family. Written by someone who has made the move herself and lived in over four different countries with her husband - who is an international school headteacher - and their four daughters, Dr Lucy Bailey provides essential, key information and more than useful advice. Proceedings of the Twenty-Second World Congress on Anti-Aging Medicine & Regenerative Biomedical Technologies, sponsored by the American Academy of Anti-Aging Medicine (A4M). A fifth edition introduction to the law and practice of the International Criminal Court since it became fully operational. *Physical Assessment for Nurses and Healthcare Professionals* offers a practical and comprehensive guide to best clinical practice when taking patient history and physical examination. This accessible text is structured in accordance with the competencies for advanced practice in assessment, diagnosis and treatment as published by the RCN. Following a systematic, systems-based approach to patient assessment, it includes a summary of the key clinical skills needed to develop and improve clinical examination in order to confidently assess, diagnose, plan and provide outstanding care. In this revised edition, colour photographs and case studies have been included to assist health care practitioners in their assessment of the patient. This important guide: Includes a highly visual colour presentation with photographs and illustrations Features a wide range of key learning points to help guide practice Offers illustrative examples, applications to practice and case studies Written for health care students, newly qualified and advanced nurse practitioners, and those in the allied health professions, *Physical Assessment for Nurses and Healthcare Professionals* is the essential guide for developing the skills needed to accurately access patient history and physical examination. This is the first volume of an authoritative three-volume treatise on international criminal law. The text provides comprehensive treatment of issues relevant to the foundations, general part of international

criminal law, and general principles of international criminal justice. Once considered disruptive to learning, technology has increasingly become an integrated and valued part of the modern classroom. In particular, mobile technologies provide the ability to encourage evocative student learning through new experiences. Promoting Active Learning through the Integration of Mobile and Ubiquitous Technologies showcases the widely varied ways that technology can be applied to enhance classroom learning. Closely examining and critiquing the best methods in assimilating technologies, this publication is a valuable resource for faculty, teachers, administrators, technology staff, directors of learning centers, and other education technology leaders interested in incorporating new technologies within the classroom for engaging student learning. Since the Shah went into exile and the Islamic Republic was established in 1979 in the wake of the Iranian Revolution, the very idea of monarchy in Iran has been contentious. Yet, as *Persian Kingship and Architecture* argues, the institution of kingship has historically played a pivotal role in articulating the abstract notion of 'Iran' since antiquity. These ideas surrounding kingship and nation have, in turn, served as a unifying cultural force despite shifting political and religious allegiances. Through analyses of palaces, mausolea, art, architectural decoration and urban design the authors show how architecture was appropriated by different rulers as an integral part of their strategies of legitimising power. They refer to a variety of examples, from the monuments of Persepolis under the Achaemenids, the Sassanian palaces at Kish, the Safavid public squares of Isfahan, the Qajar palaces at Shiraz and to the modernisation and urban agendas of the Pahlavis. Drawing on archaeology, ancient, medieval, early and modern architectural history, both Islamic and secular, this book is indispensable for all those interested in Iranian studies and visual culture. This timely book provides a comprehensive guide to, and rigorous analysis of, prosecutorial discretion at the International Criminal Court. This is the first ever study that takes the reader through all the key stages of the Prosecutor's decision-making process. Starting from preliminary examinations and the decision to investigate, the book also explores case selection processes, plea agreements, culminating in the question of how to end engagement in specific country situations. The book serves as a guide to the Rome Statute through the lens of the Prosecutor's activities. With its unique combination of legal theory and specific policy analysis, it addresses broader questions that will be relevant to other international and hybrid criminal courts and tribunals. The book will be of interest to students, practitioners of law, academics, and the wider public concerned with international law, criminal justice and international relations. Conventional health care is no longer working in your favor—but thankfully, Dr. Davis is. In his New York Times bestseller *Wheat Belly*, Dr. William Davis changed the lives of millions of people by teaching them to remove grains from their diets to reverse years of chronic health damage. In *Undoctored*, he goes beyond cutting grains to help you take charge of your own health. This groundbreaking exposé reveals

how millions of people are given dietary recommendations crafted by big business, are prescribed unnecessary medications, and undergo unwarranted procedures to feed revenue-hungry healthcare systems. With *Undoctored*, the code to health care has been cracked—Dr. Davis will help you create a comprehensive program to reduce, reverse, and cure hundreds of common health conditions and break your dependence on prescription drugs. By applying simple strategies while harnessing the collective wisdom of new online technologies, you can break free of a healthcare industry that puts profits over health. *Undoctored* is the spark of a new movement in health that places the individual, not the doctor, at the center. His plan contains features like:

- A step-by-step guide to eliminating prescription medications
- Tips on how to distinguish good medical advice from bad
- 42 recipes to guide you through the revolutionary 6-week program

*Undoctored* gives you all the tools you need to manage your own health and sidestep the misguided motives of a profit-driven medical system. In 1998, the Rome Statute to the International Criminal Court (ICC) emerged as a groundbreaking treaty both due to its codification of international criminal law and its recognition of the crimes committed against women in times of war and conflict. The ICC criminalized acts of rape, sexual slavery, and enforced pregnancy, amongst others, to provide the most advanced articulation ever of gender based violence under international law. However, thus far no scholarly book has analyzed whether or not the implementation of the ICC has been successful. The *Politics of Gender Justice at the International Criminal Court* fills this intellectual gap, specifically examining the gender justice design features of the Rome Statute (the foundation of the ICC), and assessing the effectiveness of the statute's implementation in the first decade of the court's operation. Louise Chappell argues that although the ICC has provided mixed outcomes for gender justice, there have also been a number of important breakthroughs, particularly in regards to support for female judges. Meticulous and comprehensive, this book refines the notion of gender justice principles and adds a valuable, but as yet unrecognized, gender dimension to the burgeoning historical institutionalist approach to international relations. Chappell links feminist international relations literature with feminist institutionalism literature for the first time, thereby strengthening and adding to both fields. Ultimately, Chappell's analysis is an essential step towards attaining a greater degree of gender equality in the context of international law. The definitive volume on gender and the ICC, *The Politics of Gender Justice at the International Criminal Court* is a valuable resource for students and scholars of international relations, international law, and human rights. First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years. In 1856, the US Supreme Court denied Dred Scott, now free of slavery, his Constitutional rights, solely because he was black. According to the Court, when the Constitution was drafted, some 60 years earlier, its authors would not have

intended that 'a subordinate and inferior class of beings' qualified as citizens of the United States. Thus, the meaning of language drafted over half a century before was frozen in time. This case, perhaps more than any other, demonstrates that the matter of statutory interpretation is critical, technical, and, sometimes, highly emotive. The case is not a mere nugget from history to indulge our disgust with values of another age, and with it a satisfaction of our progress to today's higher moral ground. It is the unfortunate case that the senior courts of England continue to produce highly contentious interpretations of our equality and discrimination laws. This book examines these cases from the perspective of statutory interpretation, the judge's primary function. The scrutiny finds the judgments technically flawed, overcomplicated, excessively long, and often unduly restrictive. As such, this book explains how the cases should have been resolved - using conventional methods of interpretation; this would have produced simpler, technically sound judgments. Rather like the case of Dred Scott, these were easy cases producing bad law. In recent years, our world has experienced a profound shift and progression in available computing and knowledge sharing innovations. These emerging advancements have developed at a rapid pace, disseminating into and affecting numerous aspects of contemporary society. This has created a pivotal need for an innovative compendium encompassing the latest trends, concepts, and issues surrounding this relevant discipline area. During the past 15 years, the *Encyclopedia of Information Science and Technology* has become recognized as one of the landmark sources of the latest knowledge and discoveries in this discipline. The *Encyclopedia of Information Science and Technology, Fourth Edition* is a 10-volume set which includes 705 original and previously unpublished research articles covering a full range of perspectives, applications, and techniques contributed by thousands of experts and researchers from around the globe. This authoritative encyclopedia is an all-encompassing, well-established reference source that is ideally designed to disseminate the most forward-thinking and diverse research findings. With critical perspectives on the impact of information science management and new technologies in modern settings, including but not limited to computer science, education, healthcare, government, engineering, business, and natural and physical sciences, it is a pivotal and relevant source of knowledge that will benefit every professional within the field of information science and technology and is an invaluable addition to every academic and corporate library. International criminal law is at a crucial point in its history and development, and the time is right for practitioners, academics and students to take stock of the lessons learnt from the past fifteen years, as the international community moves towards an increasingly uni-polar international criminal legal order, with the International Criminal Court (ICC) at the helm. This unique *Research Companion* takes a critical approach to a wide variety of theoretical, practical, legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international

criminal tribunals. The book is divided into four main parts. The first part analyses international crimes and modes of liability, with a view to identifying areas which have been inconsistently or misguidedly interpreted, overlooked to date or are likely to be increasingly significant in future. The second part examines international criminal processes and procedures, and here the authors discuss issues such as victim participation and the rights of the accused. The third part is a discussion of complementarity and sentencing, while the final part of the book looks at international criminal justice in context. The authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law. As international criminal law becomes more established as a distinct discipline, it becomes imperative for international criminal scholarship to provide a degree of critical analysis, both of individual legal issues and of the international criminal project as a whole. This book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse. The book comprises papers presented at the 7th International Conference on University Learning and Teaching (InCULT) 2014, which was hosted by the Asian Centre for Research on University Learning and Teaching (ACRULeT) located at the Faculty of Education, Universiti Teknologi MARA, Shah Alam, Malaysia. It was co-hosted by the University of Hertfordshire, UK; the University of South Australia; the University of Ohio, USA; Taylor's University, Malaysia and the Training Academy for Higher Education (AKEPT), Ministry of Education, Malaysia. A total of 165 papers were presented by speakers from around the world based on the theme "Educate to Innovate in the 21st Century." The papers in this timely book cover the latest developments, issues and concerns in the field of teaching and learning and provide a valuable reference resource on university teaching and learning for lecturers, educators, researchers and policy makers. Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis, their power and reliability were often questioned, yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies, as expressed by their ability to fairly, ethically and consistently assign higher rates to issuers having lesser default risks. However, factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues, and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, finance, financial economics, risk management, investment management, and banking. Some stories are considered make-believe while others are considered "real." The question that one must ask is, "What is real?". The conflicts that characters face in all tales are real enough. The

choices they make and the outcomes that occur are certainly real. Choices are often contingent upon the current conflicts being faced, and that is undoubtedly real. Jack faced a giant who wanted to eat him while King Arthur faced Saxons who simply wanted to eat. Who is real and Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league-leaders, losers, and slippers in ways that suit their own reform agendas. As a result, a myriad of explanations exist as to why an educational system is high or low performing. The chapters, written by leading scholars from Australia, Austria, Denmark, Finland, Germany, Norway, Singapore, South Korea, Spain, Sweden, Taiwan, the UK and the USA, provide a fascinating account of why results from PISA and other international large-scale assessments are interpreted and translated differently in the various countries. The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests. In some countries, these tests are also used to scandalise one's own educational system and to generate quasi-external reform pressure. Compiled by two leading scholars in comparative education, Florian Waldow and Gita Steiner-Khamsi, this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy, comparative education and political science and those working on large-scale data sets. With more than 5,800 test questions, Saunders Q&A Review for the NCLEX-RN® Examination, 5th Edition provides the practice you need to succeed on the NCLEX-RN exam. Through nine case studies, chapter authors investigate the use of mobile technologies over a range of grade levels and mathematical topics, while connecting chapters provide a strong

foundational background in mobile learning theories, instructional design, and learner support. For current educators, *Mobile Learning and Mathematics* provides concrete ideas and strategies for integrating mobile learning into their mathematics instruction—for example, by sharing resources that will help implement Common Core State Standards, or by streamlining the process of selecting from the competing and often confusing technology options currently available. A cutting edge research volume, this collection also provides a springboard for educational researchers to conduct further study. A complete roadmap to success on the Board of Certification Athletic Trainer Certification Examination. This popular study guide delivers everything students need to sit for the exam with confidence. This book provides a comprehensive overview of India's public services and bureaucratic systems, and explores why widespread corruption and inefficient delivery have slowed development. It: discusses the underlying reasons for the prevailing inefficiency in public services; examines the complex linkages between ethics-based public service, India's cultural and spiritual heritage, and its current economic development model; and outlines ways to create an ethics code and an environment that is conducive to better administration and good governance. Lucid, accessible, and meticulously researched, this will prove essential to scholars and students of public administration, governance studies and political science, particularly bureaucrats, policy-makers and civil service aspirants. It is no longer the case that it's only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of *People, Planet and Profit* believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners, insufficient attention has been paid to the end product of CSR in practice, which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders, including employees, customers, host communities, governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need; whether the CSR programmes being delivered are adequate; and about the relationship between the corporations' view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions, in terms of economic progress and social and political advancement. Il 24 novembre 2016, il governo colombiano e le Fuerzas Armadas Revolucionarias de Colombia - Ejército del Pueblo (FARC-EP) hanno firmato un accordo volto a garantire una pace stabile e duratura alla popolazione colombiana. In seguito ad una guerra civile durata per più di cinquant'anni, il più influente gruppo di guerriglieri nel paese ha mostrato la sua determinazione a porre fine alla lotta armata contro lo Stato e a perseguire i suoi scopi politici e ideologici attraverso mezzi legali e democratici. Prendendo ispirazione dai recenti sviluppi riguardanti il caso colombiano, quest'opera mette in risalto il ruolo svolto dal Diritto Internazionale e dalle relative entità giuridiche all'interno del conflitto armato combattuto tra il governo colombiano e le FARC, nonché durante i negoziati che hanno portato alla firma dell'accordo di pace nel 2016. In particolare, il lavoro valuta la conformità delle parti belligeranti con gli obblighi stabiliti da tre principali rami del Diritto Internazionale: il Diritto Internazionale Umanitario, il Diritto Internazionale Penale e il Diritto Internazionale dei Diritti Umani. On November 24, 2016, the Colombian government and the Fuerzas Armadas Revolucionarias de Colombia -

Ejército del Pueblo (FARC-EP) signed a final peace agreement aimed at guaranteeing a reliable and long-lasting peace to Colombia and its population. After a civil war lasted for more than five decades, the main guerrilla movement in the country has shown its determination to pursue its ideological purposes through legal and democratic means, permanently abandoning insurgency and revolutionary political aspirations. By taking inspiration from the recent developments concerning the Colombian case, this study evaluates the role played by International Law and the relevant international legal entities within the armed conflict fought between the Colombian government and the FARC, as well as during the negotiations that led to the signature of the peace agreement in 2016. Specifically, it assesses the compliance of the belligerent parties with the obligations established by three main bodies of law: International Humanitarian Law, International Criminal Law, and International Human Rights Law.
