The management of a water supply network can be substantially improved defining permanent sectors or districts that enhances simpler water loss detection and pressure management. However, the water network partitioning may compromise water system performance, since some pipes are usually closed to delimit districts in order not to have too many metering stations, to decrease costs and simplify water balance. This may reduce the reliability of the whole system and not guarantee the delivery of water at the different network nodes. In practical applications, the design of districts or sectors is generally based on empirical approaches or on limited field experiences. The book proposes a design support methodology, based on graph theory principles and tested on real case study. The described methodology can help water utilities, professionals and researchers to define the optimal districts or sectors of a water supply network. This timely and thought-provoking book explores how the protection of copyright in the digital age requires a reconsideration of how this is balanced with other fundamental rights and freedoms. Analysing the impact of the rise of digital technologies and the internet on copyright regimes, it particularly focuses on the effects of recent reforms to the EU's legal framework for the protection and enforcement of copyright. L'insuccesso della rivoluzione siriana e della primavera araba non significano di certo la fine dei nuovi movimenti. Dall'uscita della prima edizione di questo libro (2012), ne sono sorti altri: in Brasile (con il Movimento Passe Livre che occupa l'Avenida Paulista - una protesta che andrà avanti per mesi); e poi Gezi Park a Istanbul, l'occupazione di Maidan Square a Kiev, la rivoluzione degli ombrelli a Hong Kong, le proteste in Messico, Podemos in Spagna, il Movimento 5 Stelle in Italia. C'è una cosa che, pur nella diversità, hanno in comune: sono tutti inestricabilmente legati alla creazione di reti di comunicazione autonome, supportate da Internet e da trasmissioni wireless. Castells è in grado di rispondere onestamente e criticamente alla domanda che molti osservatori ponevano a questi movimenti: «E allora, quali sono gli specifici esiti, quali i risultati tangibili sul piano sociale? Quale è stato, ammesso che ci sia stato, il loro impatto sui sistemi politici e sulla politica concreta?» Ed è in grado di denunciare anche gli aspetti più ambigui di movimenti che utilizzano la Rete, quali ad esempio il Movimento 5 Stelle, una delle novità di questa edizione. This wide-ranging theme takes

Braudel's concept of the "Mediterranean" as its starting point. Braudel's vision of an enclosed sea as a geographical opportunity for economic integration between nations with different religions, languages and ethnicities and political bodies still functions as a model for studies on a wide range of contexts. The goal of the 50th Study Week was to go beyond the study of individual systems in isolation, and to combine instead different analysis of open and enclosed seas or coastal areas in order to understand the integration role played by maritime connections in Europe. Since in pre-industrial civilizations water transport was easier than land transport, the time has come to bring attention to the way these relationship networks operated both on a European level and with Asian and North African trade partners. This volume starts from the great research traditions which have, however, rarely been integrated on a larger and continental scale, and analyses them on either a regional or thematic basis. Immanuel Wallerstein has developed Braudel's concept by conceptualising its intercultural and transnational dimensions and its role in the system of labour. He called it a "world system", not because it involves the whole world, but because it is larger than any legally defined political unit. And it is a "world economy" because the base link between the different parts of the system has an economic nature. The various regional research aspects and traditions have been linked together in a coherent approach which aims at evaluating: - What geographical, nautical, technical, economic, legal, social and cultural elements influenced the emergence of the various regional networks, and how these worked; - The nature and role of seaports as nodal points of sea routes and of their hinterland through rivers, canals and roads; - The commercial and personal ties between merchants and shipowners in various ports; - How regional networks connected with each other and how, over time, they ended up integrating into larger units; - How private networks, initially between merchant and seafarer organizations, ended up dealing with local authorities and, after their growth, with states and empires in order to protect their interests. This book discusses the constraints on biological control ranging from the difficulty of convincing growers that they should infest their crops artificially to the effect of cultural techniques.

380.380 This Festschrift volume in honour of Prof. E R Caianiello contains invited papers of eminent scientists who have worked in the several areas to which Prof. Caianiello has given seminal contributions: quantum field theory, foundations of quantum mechanics and maximal acceleration (Vol. 1); neural nets, general systems theory and various topics of cybernetics (Vol. 2). The wide range of topics covered shows the fruitfulness of a higher unifying perspective on seemingly diverse subjects.

365.934 Expanding interdisciplinary investigations into gender and material culture, Katherine A. McIver here adds a new dimension to Renaissance patronage studies by considering domestic art - the decoration of the domestic interior - as opposed to patronage of the fine arts (painting, sculpture and architecture). Taking a multidimensional approach, McIver looks at women as collectors of precious material goods, as organizers of the early modern home, and as decorators of its interior. By analyzing the inventories of women's possessions, McIver considers the wide range of domestic objects that women owned, such as painted and inlaid chests, painted wall panels, tapestries, fine fabrics for wall and bed hangings, and elaborate jewelry (pendant earrings, brooches, garlands for the hair, necklaces and rings) as well as personal devotional objects. Considering all forms of patronage opportunities open to women, she evaluates their role in commissioning and utilizing works of art and architecture as a means of negotiating power in the court setting, in the process offering fresh insights into their lives, limitations, and the possibilities open to them as patrons. Using her subjects' financial records to track their sources of income and the circumstances under which it was spent, McIver thereby also provides insights into issues of Renaissance women's economic rights and responsibilities. The primary focus on the lives and patronage patterns of three relatively unknown women, Laura Pallavicina-Sanvitale, Giacoma Pallavicina and Camilla Pallavicina, provides a new model for understanding what women bought, displayed, collected and commissioned. By moving beyond the traditional artistic centers of Florence, Venice and Rome, analyzing instead women's artistic patronage in the feudal courts around Parma and Piacenza during the sixteenth century, McIver nuances our understanding of women's position and power both in and out of the home. Carefully integrating extensive archival

The influx of female migrants to Europe has posed challenges to established European feminist movements. In this book the author assesses the significance of female immigration to Italy and its impact on Italian feminism by analyzing the way in which immigrant and Italian women have constructed their relationships over the past 30 years. The book provides comprehensive overviews of the Italian women's movement and the history of immigration to Italy before examining the formation of immigrant women's groups, the treatment of immigrant women by Italian women's associations, and the forging of new relationships in multicultural women's organizations. Broader comparisons on European migration are made to contextualize immigration to Italy and Southern Europe more generally. By drawing from a variety of research materials such as structured interviews, participant observation and empirical data, the book contributes to an interdisciplinary approach to the study of gender, migration and contemporary Italian history. The book is of interest for scholars and postgraduates in the fields of women and gender studies, migration studies and contemporary European history.

Il volume si propone come supporto didattico per gli studenti dei corsi universitari di primo livello inerenti le Reti di Telecomunicazioni e le loro applicazioni. Il testo è stato concepito in accordo con il recente riordino degli studi con l'obiettivo principale di fornire un supporto didattico per acquisire conoscenze di base nel settore delle Reti di Telecomunicazioni con specifico riferimento alle Tecnologie Internet. Nella stesura del volume si è cercato di stabilire un filo conduttore tra la trattazione di argomenti classici e la discussione di tematiche più recenti ed innovative come le reti wireless e le reti di sensori.

\section{Background} There are some researches covering the topic of this research. In what follows, there are some discussion and literature reviews about them. \\ First article is titled ``properties of SuperHyperGraph and neutrosophic SuperHyperGraph" in \textbf{Ref.} \cite{HG1} by Henry Garrett (2022). It's first step toward the research on neutrosophic SuperHyperGraphs. This research article is published on the journal ``Neutrosophic Sets and Systems" in issue 49 and the

pages 531-561. In this research article, different types of notions like dominating, resolving, coloring, Eulerian(Hamiltonian) neutrosophic path, n-Eulerian(Hamiltonian) neutrosophic path, zero forcing number, zero forcing neutrosophic- number, independent number, independent neutrosophic-number, clique number, clique neutrosophic-number, matching number, matching neutrosophic-number, girth, neutrosophic girth, 1-zero-forcing number, 1-zero- forcing neutrosophic-number, failed 1-zero-forcing number, failed 1-zero-forcing neutrosophic-number, global- offensive alliance, t-offensive alliance, t-defensive alliance, t-powerful alliance, and global-powerful alliance are defined in SuperHyperGraph and neutrosophic SuperHyperGraph. Some Classes of SuperHyperGraph and Neutrosophic SuperHyperGraph are cases of research. Some results are applied in family of SuperHyperGraph and neutrosophic SuperHyperGraph. Thus this research article has concentrated on the vast notions and introducing the majority of notions. \ The seminal paper and groundbreaking article is titled ``neutrosophic co-degree and neutrosophic degree alongside chromatic numbers in the setting of some classes related to neutrosophic hypergraphs" in \textbf{Ref.} \cite{HG2} by Henry Garrett (2022). In this research article, a novel approach is implemented on SuperHyperGraph and neutrosophic SuperHyperGraph based on general forms without using neutrosophic classes of neutrosophic SuperHyperGraph. It's published in prestigious and fancy journal is entitled "Journal of Current Trends in Computer Science Research (JCTCSR)" with abbreviation ``J Curr Trends Comp Sci Res" in volume 1 and issue 1 with pages 06-14. The research article studies deeply with choosing neutrosophic hypergraphs instead of neutrosophic SuperHyperGraph. It's the breakthrough toward independent results based on initial background. \ The seminal paper and groundbreaking article is titled ``Super Hyper Dominating and Super Hyper Resolving on Neutrosophic Super Hyper Graphs and Their Directions in Game Theory and Neutrosophic Super Hyper Classes" in \textbf{Ref.} \cite{HG3} by Henry Garrett (2022). In this research article, a novel approach is implemented on SuperHyperGraph and neutrosophic SuperHyperGraph based on fundamental SuperHyperNumber and using neutrosophic SuperHyperClasses of neutrosophic SuperHyperGraph. It's published in prestigious and fancy journal is entitled "Journal of Mathematical Techniques and Computational Mathematics(JMTCM)" with abbreviation ``J Math Techniques Comput Math" in volume 1 and issue 3 with pages 242-263. The research article studies deeply with choosing directly neutrosophic SuperHyperGraph and SuperHyperGraph. In it, the author explores the rating systems of corporate networks and analyses the link between rating and an enterprise network. Il Volume, dedicato al tema della

Sicurezza nei Cantieri edili, ha un taglio essenzialmente pratico ed operativo per gli "addetti ai lavori", ma rigorosamente inquadrato nel sistema legislativo come interpretato dalla giurisprudenza. L'intreccio tra la migrazione in Italia e la pratica della scrittura letteraria in lingua italiana accomuna le donne le cui storie, raccolte in lunghe interviste biografiche, sono presentate e analizzate in questo volume. La migrazione può configurarsi come esperienza di sradicamento e di solitudine, anche in ragione delle forme di esclusione attive nella società d'approdo. Ma la pratica della scrittura, nella nuova lingua, può essere strumento attraverso il quale costruire nuove appartenenze e sentire di poter avere, ancora, «un posto nel mondo», come afferma una delle donne intervistate. Le biografie raccolte mettono in crisi l'immaginario egemonico sulle "donne migranti", popolato da stereotipi in cui si intersecano assunti razzisti, sessisti ed eurocentrici. L'esperienza della scrittura in migrazione viene interpretata e discussa come una pratica di soggettivazione, una pratica cioè attraverso la quale le donne migranti cessano di essere soggetti narrati e si rendono soggetti narranti, potendo così contribuire a ri-nominare e ri-significare i processi di costruzione e reificazione dell'alterità. «Questo è un libro in cui la sociologia è vivente. Promuove e articola la percezione di uno scarto fra le esperienze di chi questo mondo lo abita e i modi in cui le narrazioni più correnti le deformano. Promuove e articola curiosità e critica. È un libro molto bello. Io spero che lo leggano in tanti». Dalla Prefazione di Paolo Jedlowski
