The Lives of Robert Ryan provides an inside look at the gifted, complex, intensely private man whom Martin Scorsese called “one of the greatest actors in the history of American film.” The son of a Chicago construction executive with strong ties to

the Democratic machine, Ryan became a star after World War II on the strength of his menacing performance as an anti-Semitic murderer in the film noir *Crossfire*. Over the next quarter century he created a gallery of brooding, neurotic, and violent characters in such movies as *Bad Day at Black Rock*, *Billy Budd*, *The Dirty Dozen*, and *The Wild Bunch*. His riveting performances expose the darkest impulses of the American psyche during the Cold War. At the same time, Ryan's marriage to a liberal Quaker and his own sense of conscience launched him into a tireless career of peace and civil rights activism that stood in direct contrast to his screen persona. Drawing on unpublished writings and revealing interviews, film critic J.R. Jones deftly explores the many contradictory facets of Robert Ryan's public and private lives, and how these lives intertwined in one of the most compelling actors of a generation. "This book ... presents for the first time all of the thirty-nine known O'Sullivan photos of Fort Fisher and the immediate vicinity, and two of the U.S. Navy's task force assembled to attack the fort. After more than three decades of studying Fort Fisher's history, [the author] has reassembled the most complete photographic record of O'Sullivan's images of Fort Fisher known to exist"--Foreword. Over the course of two decades, *Urban Economics* has achieved a worldwide audience, and has been translated into

Chinese, Greek, Russian, and Korean. Like the eight previous editions, this edition provides a clear and concise presentation of the economic forces that: - cause the development of cities;- determine the spatial form of cities;- cause urban economies to grow or shrink;- generate urban problems such as poverty, crime, and congestion;- make the market for urban housing unique; and- shape the tax and spending policies of local governments. In addition to developing the basic concepts of urban economics, the book uses economic analysis to evaluate the merits of policies designed to address our most vexing urban problems. A gripping investigation into one of Irish history's greatest mysteries, Great Hatred reveals the true story behind one of the most significant political assassinations to ever have been committed on British soil. 'Heart-stopping . . . The book is both forensic and a page-turner, and ultimately deeply tragic, for Ireland as

much as for the murder victim.' MICHAEL PORTILLO 'Gripping from start to finish. McGreevy turns a forensic mind to a political assassination that changed the course of history, uncovering a trove of unseen evidence in the process.' ANITA ANAND, author of *The Patient Assassin* 'Invaluable.' IRISH TIMES 'Intelligent and insightful.' IRISH INDEPENDENT On 22 June 1922, Sir Henry Wilson - the former head of the British army and one of those credited with winning the First World War - was shot and killed by two veterans of that war turned IRA members in what was the most significant political murder to have taken place on British soil for more than a century. His assassins were well-educated and pious men. One had lost a leg during the Battle of Passchendaele. Shocking British society to the core, the shooting caused consternation in the government and almost restarted the conflict between Britain and Ireland that had ended with the Anglo-Irish Treaty just five months earlier. Wilson's assassination triggered the Irish Civil War, which cast the darkest of shadows over the new Irish State. Who ordered the killing? Why did two English-born Irish nationalists kill an Irish-born British imperialist? What was Wilson's role in the Northern Ireland government and the violence which matched the intensity of the Troubles fifty years later? Why would Michael Collins, who risked

his life to sign a peace treaty with Great Britain, want one of its most famous soldiers dead, and how did the Wilson assassination lead to Collins' tragic death in an ambush two months later? Drawing upon newly released archival material and never-before-seen documentation, *Great Hatred* is a revelatory work that sheds light on a moment that changed the course of Irish and British history for ever. 'McGreevy provides more than the anatomy of a political murder; in reconstructing this era of blood, poverty and wartime trauma, he also gives full expression to the terrible forces that WB Yeats once called the "fanatic heart" and the "great hatred".' *THE TIMES* 'Thoughtful and well-researched . . . an important and valuable addition to the library of the Irish Revolution.' PROFESSOR DIARMAID FERRITER, University College Dublin

The Manual of Clinical Oncology, Ninth Edition, published with the International Union Against Cancer (UICC), provides a concise, accessible and feasible reference covering state of art multidisciplinary clinical oncology in order to meet the needs of clinicians caring for cancer patients throughout the world. Edited by world-renowned practising oncologists and written by key opinion leaders, this book contains authoritative and up-to-date information on cancer detection, diagnosis and treatment alongside topics such as survivorship, special populations and palliative care. Remodelled

and revised for the ninth edition to provide practical information to oncology workers, the UICC Manual of Clinical Oncology is structured in two parts. Part 1 covers general principles of cancer diagnosis and management with additional attention to special settings in oncology, including supportive care and survivorship, and Part 2 covers site-specific multidisciplinary cancer management. The edition includes up-to-date summaries of all treatment modalities (medical, surgical and radiation) for all tumour sites. It also contains the latest TNM classifications outlined in the TNM Classification of Malignant Tumours. The ninth edition includes: Practical presentation with bullet points, tables, and flow charts intended to facilitate quick reference for day-to-day clinical practice in busy oncology environments, Representation of multidisciplinary care for site specific management, Evidence-based approaches to management, including specific treatment recommendations and investigations guided by clinical practice guidelines, State of art evidence-based recommendations that take into consideration the lack of availability of certain medications or resources, as well as practice variations, in different and remote regions of the world, and Contemporary topics on cancer treatment, such as cancer informatics, evidence levels, principles of prognostication, survivorship and cancer in

pregnancy. Oncologists, oncologists-in-training, nurses working with cancer patients and other health professionals responsible for treating and caring for those with cancers will find the UICC Manual of Clinical Oncology an indispensable and comprehensive resource. PERPERience to take us behind the scenes of competitive youth sports, and demonstrates how they have changed from being a fun pastime to an ultra competitive, adult centered enterprise that is failing our children. In a series of philosophical discussions and artistic case studies, this volume develops a materialist and immanent approach to modern and contemporary art. The argument is made for a return to aesthetics - an aesthetics of affect - and for the theorization of art as an expanded and complex practice. Staging a series of encounters between specific Deleuzian concepts - the virtual, the minor, the fold, etc. - and the work of artists that position their work outside of the gallery or 'outside' of representation - Simon O'Sullivan takes Deleuze's thought into other milieus, allowing these 'possible worlds' to work back on philosophy. This introductory but innovative textbook on the economics of cities is aimed at students of urban and regional policy as well as of undergraduate economics. It deals with standard topics, including automobiles, mass transit, pollution, housing, and education but it also discusses non-standard topics such as segregation,

water supply, sewers, garbage, fire prevention, housing codes, homelessness, crime, illicit drugs, and economic development. The text is designed as the main text for an undergraduate course in Behavioral Economics, which is a growing course for students of economics at the undergraduate level. The presentation is grounded in microeconomics and traditional economic models to discuss observed human behavior. The book presents models that show the trade-offs between material benefits and social concerns. The models incorporate social concerns such as altruism, guilt, exploitation, fairness, and cognitive dissonance. Unlike many other books on behavioral economics, the text is not a catalog of human quirks. Although the book highlights all sorts of observed behavior that appears irrational and misguided, it doesn't stop there. It examines the possible motives for the puzzling behavior. For many misguided and regrettable choices, we highlight actions taken to control the behavior and mitigate the damage. We use the insights of anthropologists and economists to explore the role of natural selection in shaping human thinking and behavior. A decision that appears irrational today may be understandable in the context of millions of years of natural selection. Recent work explores the role of natural selection in (i) loss aversion, (ii) the endowment effect, (iii) time preferences, and (iv) responses to the free-

rider problem. Over the course of two decades, Urban Economics has achieved a worldwide audience, and has been translated into Chinese, Greek, Russian, and Korean. A neurologist explores the very real world of psychosomatic illness. Most of us accept the way our heart flutters when we set eyes on the one we secretly admire, or the sweat on our brow as we start the presentation we do not want to give. But few of us are fully aware of how dramatic our body's reactions to emotions can sometimes be. Take Pauline, who first became ill when she was fifteen. What seemed at first to be a urinary infection became joint pain, then food intolerances, then life-threatening appendicitis. And then one day, after a routine operation, Pauline lost all the

strength in her legs. Shortly after that her convulsions started. But Pauline's tests are normal; her symptoms seem to have no physical cause whatsoever. Pauline may be an extreme case, but she is by no means alone. As many as a third of men and women visiting their GP have symptoms that are medically unexplained. In most, an emotional root is suspected and yet, when it comes to a diagnosis, this is the very last thing we want to hear, and the last thing doctors want to say. In *It's All in Your Head* consultant neurologist Dr Suzanne O'Sullivan takes us on a journey through the very real world of psychosomatic illness. She takes us from the extreme -- from paralysis, seizures and blindness -- to more everyday problems such as tiredness and pain. Meeting her patients, she encourages us to look deep inside the human condition. There we find the secrets we are all capable of keeping from ourselves, and our age-old failure to credit the intimate and extraordinary connection between mind and body. The life of nineteenth-century journalist, diplomat, adventurer, and enthusiast for lost causes John Louis O'Sullivan is usually glimpsed only in brief episodes, perhaps because the components of his life are sometimes contradictory. An exponent of romantic democracy, O'Sullivan became a defender of slavery. A champion of reforms for women, labor, criminals, and public schools, he ended his life promoting

spiritualism. This first full-length biography reveals a man possessed of the idealism and promise, as well as the prejudices and follies, of his age, a man who sensed the revolutionary and liberating potential of radical democracy but was unable to acknowledge the racial barriers it had to cross to fulfill its promise. Sure to be welcomed by scholars of the Jacksonian era and others interested in nineteenth-century American history, John L. O'Sullivan and His Times presents an in-depth examination of O'Sullivan's ideas as they were expressed in the Democratic Review and other newspapers and literary magazines that he edited. O'Sullivan was a crusader whose efforts to end capital punishment came within a hair's breadth of ending hanging in New York; an editor who called down the wrath of the w An investigation of the assassination of Robert Kennedy details the events of June 5, 1968, and discusses evidence suggesting that convicted assassin Sirhan Sirhan did not act alone and may have been part of a conspiracy. This first-ever volume focusing on sports pulp fiction devoted to America's two most popular pastimes of the 1935-1957 era--baseball and football--provides extensive detail on authors, along with examination of key plots, themes, trends and categories. Commentary relates the works to real-life baseball and football of the period. The history of the genre is traced, beginning with the debut of Dime Sport

(later renamed Dime Sports), the first magazine from a major publisher to provide competition for Street & Smith's long-established Sport Story Magazine. Complementing the text is a complete catalog of fiction from the six major publishers who competed with S&S, also noting the cover themes for 1,054 issues.
